## **Producer Price Inflation increased to 19.6% in October 2012**

The Producer Price Index (PPI) measures the average change over time in the prices received by domestic producers for the production of their goods and services. The PPI for Ghana reports the price indices with reference to September 2006, the base period.

This bulletin shows the producer price changes since September 2006, as well as the annual (year-on-year) and monthly inflation rates, for all industry and three major sub-sectors of industry (Mining and Quarrying, Manufacturing, and Utilities) for the last twelve months. The data for the month in reference are provisional, and are subject to revision in the following month. All other data are final.

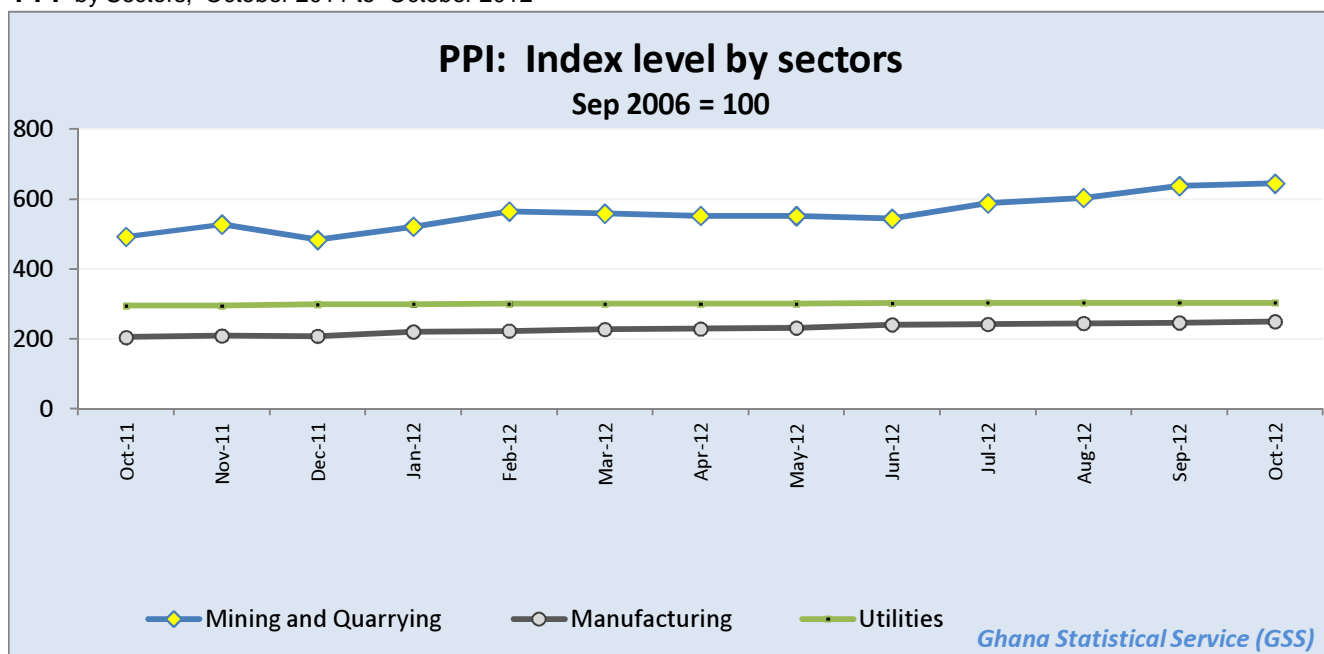

The Producer Price Inflation rate was 19.6 percent in October 2012 (year-on-year), representing an increase in producer inflation of 2.8 percentage points relative to the rate recorded in September 2012 (16.8%). The month-on-month change in producer prices between September 2012 and October 2012 was 1.1 percent.

In October 2012, the producer price inflation in the mining and quarrying sector increased by approximately 11.3 percentage points over the September 2012 rate of 19.5 percent, to record 30.8 percent. Manufacturing, which constitutes more than two-thirds of total industry, increased to 22.2 percent, from a rate of 20.5 percent in September 2012. The Utilities sector recorded 3.0 percent inflation rate in September, 2012 but decrease slightly to 2.9 percent in October, 2012.

During the 12-month period (October 2011 to October 2012), all industry recorded the highest inflation in October 2012 (19.6%) and the lowest in December 2011 (13.6%). From January to May 2012, the producer inflation fluctuated between 15.0 percent and 16.6 percent. However, in June 2012, the rate rose to 19.1 percent but declined slightly in July 2012 to 19.0 percent and further dropped to 17.8 percent in August. The declining trend continued in September 2012 to record an inflation rate of 16.8 percent. However, in October 2012 the rate increased significantly to 19.6 percent.

During the month of October 2012, six out of the sixteen major groups in the manufacturing sector recorded inflation rates higher than the sector average of 22.2 percent. Publishing, printing and reproduction of recorded media recorded the highest inflation rate (42.0%) whilst Manufacture of machinery and equipments n.e.c recorded negative inflation (-0.3%).

## PPI by Sectors; October 2011 to October 2012

### Selected records:

**All items PPI:** Annual rate 19.6 percent; down from 16.8 percent last month; was lower in December 2011 to May 2012 and October 2011.

**Petroleum Price Index:** Annual rate 16.7 percent; down from 16.6 percent last month.

**Manufacture of food products and beverages:** Annual rate was 22.8 percent for October 2012, up from 22.6 percent in September 2012.

**Manufacture of textiles:** Annual rate 40.1 percent; down from 50.6 percent last month.

**Electricity and Water Supply:** Annual rate is 3.1 percent; down from 3.0 percent last month.

### Dissemination

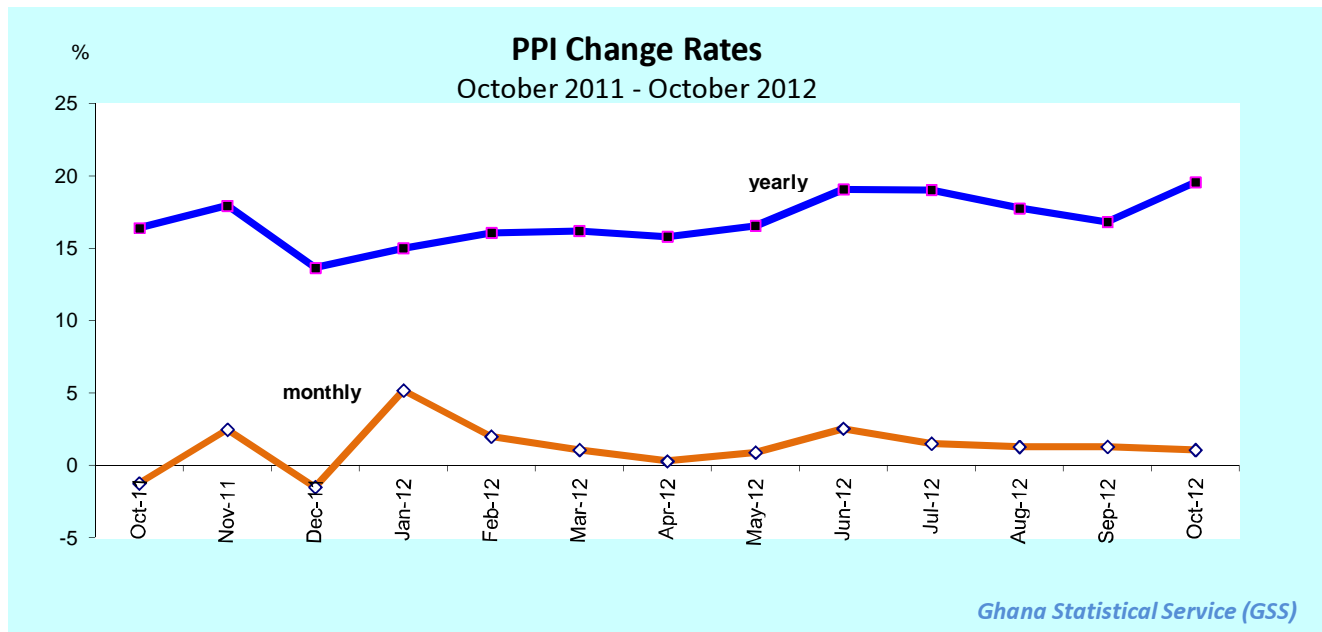

The bulletin on the October 2012 PPI and more detailed data in time series format have been posted on the website [www.statsghana.gov.gh](http://www.statsghana.gov.gh).

**The next release date is 19<sup>th</sup> December 2012.**
